

**Retraction Notice: Impact of charm H1-ZEUS combined data and determination of the strong coupling in two different schemes (Chin. Phys. C 41(11) 113104 (2017))**

DOI: 10.1088/1674-1137/42/8/089001

This article has been retracted at the request of the Editor-in-Chief, in accordance with our policy on publishing ethics.

The article presents essentially the same research as two other papers published by the same authors (Eur. Phys. J. A53 (2017) no.11, 220, 10.1140/epja/i2017-12405-4 and Nucl. Phys. B921 (2017) 472-486, 10.1016/j.nuclphysb.2017.06.011). While the authors modified the text and plots, there is no significant difference in the method, data or results. After thorough investigation by internal and external reviewers, our conclusion is that this work does not merit three separate publications, as the scientific information is the same.

During submission, authors explicitly declare that the work is original and is not published or under consideration for publication elsewhere. This publication is therefore a serious breach of scientific publishing ethics. The Editorial Board of Chin. Phys. C treats such matters extremely seriously, and hereby retracts this article.

The Editors apologise to our readers that this problem was not detected earlier in the publication process.
